

Draft News Release

mBank Poland Deploys HID Global's Multi-Factor Authentication Solution for Secure Internet and Mobile Banking

News highlights:

- HID Global's ActivID® DisplayCard Tokens offer mBank's corporate banking customers an advanced, multi-factor authentication solution for secure access to their Internet and mobile banking accounts.
- mBank is looking to further collaborate with HID Global to extend its corporate banking offering to include new, advanced solutions for its retail banking customers
- The token includes a touchpad for secure PIN entry that can fit in customers' wallets easily, making it highly portable and allowing access to their Internet bank accounts anytime, anywhere.

AUSTIN, Texas, July 16, 2014 – [HID Global](#)®, a worldwide leader in secure identity solutions, today announced that mBank, a leading Polish Bank (owned by Commerzbank), has successfully deployed HID Global's ActivID® DisplayCard Tokens. The tokens provide mBank's corporate banking customers with an advanced, multi-factor authentication solution to securely access their Internet and mobile banking accounts. Headquartered in Warsaw, Poland, mBank is amongst the pioneers for corporate banking services in the country. It was also recognized in 2013 by Efma and Accenture as "The Most Disruptive Innovation" for projects and initiatives in the retail financial services arena that radically change and redefine the way it does business.

mBank was seeking a highly secure, convenient and innovative Internet and mobile banking authentication solution that was easy to deploy. HID Global's ActivID DisplayCard Tokens were selected by mBank based on these stringent requirements and HID Global's unique, patented algorithm that was interoperable with mBank's back-end system. Further, HID Global was recognized by the bank as a reputable brand that offered strong authentication and advanced fraud protection based on its long-standing relationship and successful implementations over the last 10 years.

"HID Global is a trusted and recognized brand that offers the best solutions in the market. The company's ActivID® DisplayCard Tokens were easy to integrate into mBank's banking solutions," said Aleksander Gawroński, Electronic Banking Director with mBank. "Thanks to HID Global, we are able to offer our corporate banking customers an improved, convenient and higher security multi-factor authentication method when accessing their accounts on the Internet and on their mobile phones."

"We are very proud to have supported mBank, one of the most credible Polish banks, with an advanced and innovative authentication solution that enhances their corporate customers' Internet banking experience.

HID Global's identity assurance offering has consistently proven to be the most reliable and trusted in the marketplace,” said Harm Radstaak, Managing Director EMEA with HID Global.

The ActivID DisplayCard Token has enabled mBank to offer its corporate banking customers a customized, credit card style authentication solution. The token includes a touchpad for secure PIN entry that can fit in customers’ wallets easily, making it highly portable and allowing access to their Internet bank accounts anytime, anywhere. Providing this enhanced customer satisfaction has resulted in mBank retaining its customer loyalty. The ActivID DisplayCard eliminates the need for special readers and is an all-in-one solution that delivers a cost-effective solution to mBank.

Based on its continued successful relationship with HID Global, mBank is looking to further collaborate with the company to extend its corporate banking offering to include new, advanced solutions for its retail banking customers.
